OpenAgri Journal 5: get an update of Milan's project

See on UIA website

The last year of OpenAgri wasn't an easy one. After more than three years, the project is coming to an end, and it is time to celebrate its results and reflect on this experience. The fifth edition of OpenAgri Journal describes and analyses the progress of the project from August 2019 to October 2020 and prepare for the future beyond the project, it will attempt to illustrate some of the findings of the project and to put on paper some lessons learned, in the spirit of the capitalisation and dissemination aim. The content is based on my site visit to Milan that took place on January 2020 and on regular online meetings with the OpenAgri team.
